Attached is a letter I have just sent the CAG members. It summarizes what I covered with them at the last meeting when Judy was going over the initial update of the EPA Community Involvement Plan. The letter makes it clear we will be cooperating with EPA and LWG efforts and that the City will have some form of public process before taking positions on cleanup and risk levels and other issues. Judy and I will be getting together soon to discuss how all this can work.

Of course, the CAG (Jan, Robin and Jim in particular) members are interested in being further engaged prior to issuance of the draft FS and it may be we can all accommodate that with additional briefings and interactions with them between now and next June. See you all soon.  
Have  
a good Veteran's Day break.
